Green roofs seem to set a trend in China

ECO DESIGN

Buildings are coming up in different shapes, sizes, and representations. There are a lot many varieties of rendering that could add liveliness and beauty to buildings. A mirror rendering of huge buildings is one such rendering that is looked upon as a fusion of contemporariness and natural touch. It is considered as a favorite rendering for the past few years as it creates a good visual appeal through the reflection of the skies in the mirror. Along these lines, there is yet another new rendering that adds both beauty and eco-friendliness to the buildings called green roofing. Architects always look out for new innovative ways to add zeal to their buildings and this green roofing, no wonder, has garnered a lot of appreciation from all corners. Through this designing, the architects are exploring a new way of building that would bring down the roof to the ground level. This would give...[read more](#)

CSR responsible corporates rise their number to 70%

CORPORATE SOCIAL RESPONSIBILITY

A worldwide survey, conducted in 16 countries, including Canada, the United States, China, Denmark, India, France and Germany, regarding investment for dealing with climate changes, has revealed...[read more](#)

Parking and why it isn't green

AUTO AND MOBILITY

A parking structure that is completely made of recyclable material is made in the Netherlands by the Paul de Ruiter Architects. This initiative is taken so that the park remains the same to meet with...[read more](#)
